**Prof. Dogan Kisacik**

The Institute of Marine Sciences and Technology,  
Dokuz Eylul University, İzmir, Turkey

January 15<sup>th</sup> 2020

**SEMINAR:**

**"WAVE OVERTOPPING ON COASTAL STRUCTURES"**

**12:00-13:00 – Aula 107**

Overtopping is defined as the amount of water flowing over the crest of a coastal structure due to wave action. This seminar will focus on the wave overtopping phenomena on two different coastal protection structures; i) Wave Overtopping on Vertical Sea Walls and ii) Wave Overtopping on Coastal Dikes.
